14
15 **IN THE UNITED STATES DISTRICT COURT**
16
17 **FOR THE NORTHERN DISTRICT OF CALIFORNIA**

18 FINJAN, INC., a Delaware Corporation,
19
20 Plaintiff,
21
22 v.
23 WEBSense, INC., a Delaware Corporation,
24
25 Defendant.

Case No.:

**COMPLAINT FOR PATENT
INFRINGEMENT**

DEMAND FOR JURY TRIAL

COMPLAINT FOR PATENT INFRINGEMENT

Plaintiff Finjan, Inc. (“Finjan”) files this Complaint for Patent Infringement and Jury Demand against Defendant Websense, Inc. (“Defendant” or “Websense”) and alleges as follows:

THE PARTIES

1. Finjan is a Delaware corporation, with its corporate headquarters at 1313 N. Market Street, Suite 5100, Wilmington, Delaware 19801. Finjan’s U.S. operating business was previously headquartered at 2025 Gateway Place, San Jose, California 95110.

2. Websense is a Delaware corporation, with its principal place of business at 10240 Sorrento Valley Road, San Diego, California 92121.

JURISDICTION AND VENUE

3. This action arises under the Patent Act, 35 U.S.C. §§ 101 *et seq.* This Court has original jurisdiction over this controversy pursuant to 28 U.S.C. §§ 1331 and 1338.

4. Venue is proper in this Court pursuant to 28 U.S.C. §§ 1391(b) and (c) and/or 1400(b).

5. This Court has personal jurisdiction over Defendant. Upon information and belief, Defendant does business in this District and has, and continues to, infringe and/or induce the infringement in this District. Defendant also markets its products primarily in and from this District. In addition, the Court has personal jurisdiction over Defendant because it has established minimum contacts with the forum and the exercise of jurisdiction would not offend traditional notions of fair play and substantial justice.

INTRADISTRICT ASSIGNMENT

6. Pursuant to Local Rule 3-2(c), Intellectual Property Actions are assigned on a district-wide basis.

FINJAN'S INNOVATIONS

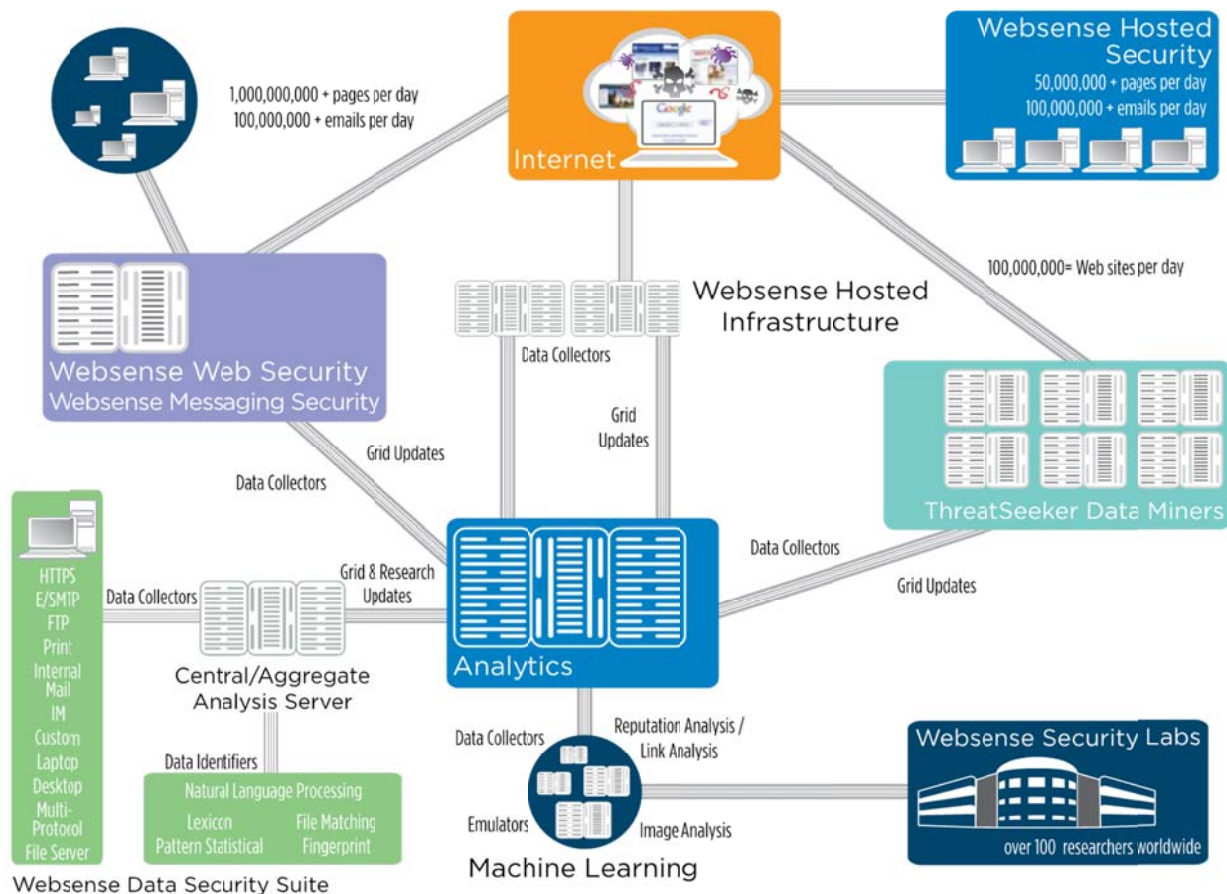

1
2 7. Finjan was founded in 1997 as a wholly-owned subsidiary of Finjan Software Ltd., an
3 Israeli corporation. Finjan was a pioneer in the developing proactive security technologies capable of
4 detecting previously unknown and emerging online security threats recognized today under the
5 umbrella of “malware.” These technologies protect networks and endpoints by identifying suspicious
6 patterns and behaviors of content delivered over the Internet. Finjan has been awarded, and continues
7 to prosecute, numerous patents in the United States and around the world resulting directly from
8 Finjan’s more than decade-long research and development efforts, supported by a dozen inventors.
9

10 8. Finjan built and sold software, including APIs, and appliances for network security
11 using these patented technologies. These products and customers continue to be supported by
12 Finjan’s licensing partners. At its height, Finjan employed nearly 150 employees around the world
13 building and selling security products and operating the Malicious Code Research Center through
14 which it frequently published research regarding network security and current threats on the Internet.
15 Finjan’s pioneering approach to online security drew equity investments from two major software and
16 technology companies, the first in 2005, followed by the second in 2006. Through 2009, Finjan has
17 generated millions of dollars in product sales and related services and support revenues.
18

19 9. Finjan’s founder and original investors are still involved with and invested in the
20 company today, as are a number of other key executives and advisors. Currently, Finjan is a
21 technology company applying its research, development, knowledge and experience with security
22 technologies to working with inventors, investing in and/or acquiring other technology companies,
23 investing in a variety of research organizations, and evaluating strategic partnerships with large
24 companies.
25
26
27
28

16. Websense's Data Security Products include the software and appliances running Data Security Suite and Data Security Gateway. See <http://www.websense.com/content/websense-data-security-products.aspx> (attached as Exhibit D).

17. Shown below is a diagram of Websense's products and services. See WP HoneyGrid Computing.pdf at 5 (attached as Exhibit E):

18. The TRITON Products, Web Security Gateway Products and CSI Service rely on the Websense ThreatSeeker Network. The ThreatSeeker Network seeks out threats contained within web, social media and email content and analyzes three to five billion requests per day. The TRITON Products, Web Security Gateway Products, Data Security Products, CSI Service and Websense ThreatSeeker Network utilize Websense's Advanced Classification Engine ("ACE") to detect

malicious content. ACE and the ThreatSeeker Network are maintained by Websense and the Websense Security Labs. See <http://www.websense.com/content/websense-triton-security-products.aspx> (attached as Exhibit B); <http://www.websense.com/content/web-security-gateway-features.aspx> (attached as Exhibit F); [datasheet-ace-in-the-cloud-en.pdf](#) (attached as Exhibit G); [datasheet-csi-en.pdf](#) (attached as Exhibit H); and <http://www.websense.com/content/websense-threatseeker-network.aspx> (attached as Exhibit I). Shown below is a diagram depicting technologies in Websense's ACE. See [datasheet-ace-in-the-cloud-en.pdf](#) at 2 (attached as Exhibit G):

19. ACE provides inline contextual defenses for web, email, data and mobile security using analytics to create a composite risk score for downloaded content and is the primary engine for all of Websense's TRITON Products. ACE includes Real-Time Security Classification ("RTSC") for detection of exploit code and malicious browser plugins, JavaScript, ActiveX, shell code, exploit kits, cross-site scripts and incorporated built-in parsing, obfuscation detection and de-obfuscation. See [Websense ACE 77 WhitePaper.pdf](#) at 3-4 (attached as Exhibit J); *see also* [ACE Insight Sample.pdf](#) (attached as Exhibit K), <http://www.websense.com/content/websense-advanced-classification-engine.aspx> (attached as Exhibit L).

1 20. CSI Service includes the ThreatScope online sandbox for detecting potential malware.
2 The ThreatScope monitors all activity of potential malware and documents all activity in a detailed
3 report including the infection process, post-infection activities including network communications,
4 system-level events and processes and registry changes and file modifications. ThreatScope takes the
5 observed behavior and correlates it with known threats to provide information on zero-day threats in
6 real-time. *See* [datasheet-csi-en.pdf](#) (attached as Exhibit H); *see also* [ThreatReport-Complete.pdf](#)
7 (attached as Exhibit M).

8
9 21. Websense Data Security Products and TRITON Products detect unusual behavior in a
10 network such as small amounts of confidential data being sent over multiple communications
11 channels, or over an extended period of time. *See* [www.websense.com/content/data-security-suite-](http://www.websense.com/content/data-security-suite-features.aspx)
12 [features.aspx](http://www.websense.com/content/data-security-suite-features.aspx) (attached as Exhibit N). Websense Data Security Products and TRITON Products
13 include cumulative incident memory that remembers a user's breaches over time and creates incidents
14 when a threshold is met, as well as machine learning for establishing examples of content that a user
15 wants to protect. *See* [v7.7 Release Notes for Websense® Data Security](#) at 2-3 (attached as Exhibit
16 O).

17
18 22. Websense TRITON Products and Web Security Gateway Products can filter files
19 based on their true file type. The TRITON Products and Web Security Gateway Products utilize
20 content stripping to remove unwanted or potentially malicious content. *See* [Triton_web_help.pdf](#) at
21 pages 198-99, 282-83 and 286-87 (attached as Exhibit P).

22 **WEBSENSE'S INFRINGEMENT OF FINJAN'S PATENT**

23
24 23. Defendant has been and is now infringing the '494 Patent in this judicial District, and
25 elsewhere in the United States by, among other things, making, using, importing, selling, and/or
26 offering for sale the claimed systems and methods on the Websense TRITON Products, Web Security
27
28

1 Gateway Products, Data Security Products, CSI Service, ThreatSeeker Network and products or
2 services using ACE.

3 24. In addition to directly infringing the '494 Patent pursuant to 35 U.S.C. § 271(a) either
4 literally or under the doctrine of equivalents, Defendant indirectly infringes the '494 Patent pursuant
5 to 35 U.S.C. § 271(b) by instructing, directing and/or requiring others, including its users and
6 developers, to perform all or some of the steps of method claims of the '494 Patent, either literally or
7 under the doctrine of equivalents.
8

9 **COUNT I**

10 **(Direct Infringement of the '494 Patent pursuant to 35 U.S.C. § 271(a))**

11 25. Finjan repeats, realleges, and incorporates by reference, as if fully set forth herein, the
12 allegations of the preceding paragraphs, as set forth above.

13 26. Defendant has infringed and continues to infringe one or more claims of the '494
14 Patent in violation of 35 U.S.C. § 271(a).

15 27. Defendant's infringement is based upon literal infringement or, in the alternative,
16 infringement under the doctrine of equivalents.

17 28. Defendant's acts of making, using, importing, selling, and/or offering for sale infringing
18 products and services have been without the permission, consent, authorization or license of Finjan.

19 29. Defendant's infringement includes, but is not limited to, the manufacture, use, sale,
20 importation and/or offer for sale of Defendant's products and services, including but not limited to
21 Websense TRITON Products, Web Security Gateway Products, Data Security Products, CSI Service
22 and Websense products and services using ACE or ThreatSeeker, which embody the patented
23 invention of the '494 Patent.
24
25
26
27
28

31. Defendant's infringement of the '494 Patent has injured and continues to injure Finjan in an amount to be proven at trial.

COUNT II
(Indirect Infringement of the ‘494 Patent pursuant to 35 U.S.C. § 271(b))

32. Finjan repeats, realleges, and incorporates by reference, as if fully set forth herein, the allegations of the preceding paragraphs, as set forth above.

33. Defendant has induced and continues to induce infringement of at least claims 1-9 of the '494 Patent under 35 U.S.C. § 271(b).

34. In addition to directly infringing the '494 Patent, Defendant indirectly infringes the '494 Patent pursuant to 35 U.S.C. § 271(b) by instructing, directing and/or requiring others, including but not limited to its customers, users and developers, to perform all or some of the steps of the method claims, either literally or under the doctrine of equivalents, of the '494 Patent, where all the steps of the method claims are performed by either Websense or its customers, users or developers, or some combination thereof. Defendant knew or was willfully blind to the fact that it was inducing others, including customers, users and developers, to infringe by practicing, either themselves or in conjunction with Defendant, one or more method claims of the '494 Patent.

35. Defendant knowingly and actively aided and abetted the direct infringement of the '494 Patent by instructing and encouraging its customers, users and developers to use the Websense TRITON Products, Web Security Gateway Products, Data Security Products, CSI Service and Websense products and services using ACE or ThreatSeeker. Such instructions and encouragement include, but are not limited to, advising third parties to use the Websense TRITON Products, Web

Security Gateway Products, Data Security Products, CSI Service and Websense products and services using ACE or ThreatSeeker in an infringing manner; providing a mechanism through which third parties may infringe the '494 Patent, specifically through the use of the Websense TRITON Products, Web Security Gateway Products, Data Security Products, CSI Service and Websense products and services using ACE or ThreatSeeker, advertising and promoting the use of the Websense TRITON Products, Web Security Gateway Products, Data Security Products, CSI Service and Websense products and services using ACE or ThreatSeeker in an infringing manner, and distributing guidelines and instructions to third parties on how to use the Websense TRITON Products, Web Security Gateway Products, Data Security Products, CSI Service and Websense products and services using ACE or ThreatSeeker in an infringing manner.

36. Websense regularly updates and maintains the Websense website (<http://www.websense.com>), the Websense Support Center (<http://www.websense.com/content/support.aspx>) and the Websense ACE InsightTM and ThreatScopeTM Portals (*see* <http://csi.websense.com/> and <http://csi.websense.com/ThreatScope/Index>) to provide demonstration, instruction, and technical assistance to users to help them use the Websense TRITON Products, Web Security Gateway Products, Data Security Products, CSI Service and Websense products and services using ACE or ThreatSeeker, including:

- Industry firms make Websense® TRITONTM second to none (*see e.g.*, www.websense.com/content/TRITONseven7.aspx, attached as Exhibit Q, states that “Websense TRITON solutions give you the best defense against advanced threats.”);
- TRITON – Web Security Help: Websense® Web Security Solutions (*see e.g.*, [triton_web_help.pdf](#) at 17, attached as Exhibit P, describes how to use the TRITON product and that “[t]o learn to use Websense Web Security solutions and find answers to your questions, browse this guide ...”);
- Sample ACE InsightTM and ThreatScopeTM Reports (*see e.g.*, [ACE Insight Sample.pdf](#), attached as Exhibit K, and [ThreatReport-Complete.pdf](#), attached as Exhibit M);

- 1 • Websense® CyberSecurity Intelligence™ Services Datasheet (*see e.g.*, [datasheet-csi-en.pdf](#),
2 attached as Exhibit H, states that “[s]ecurity analysts say that in-house resources alone are not
3 enough. Websense CyberSecurity Intelligence (CSI) services let your IT staff join forces with
4 Websense Security Labs™ ...”);
- 4 • About Websense® Security Labs (*see e.g.*,
5 <http://securitylabs.websense.com/content/about.aspx>, attached as Exhibit R, states that “[w]ith
6 emerging threats changing their attack profiles at unprecedented rates, security professionals
7 must wisely predict the future to provide today’s proactive solutions.”);
- 7 • Security Overview: Websense® ACE (Advanced Classification Engine) (*see e.g.*,
8 [Websense ACE 77 WhitePaper.pdf](#), attached as Exhibit J, states that “[w]ith the declining
9 effectiveness of security solutions previously considered ‘core’, it is vital to consider what ACE
10 can offer through Websense web, email, data, and mobile security solutions, whether through
11 appliance gateways or cloud security services or a hybrid deployment.”); and
- 12 • The Websense® ThreatSeeker® Network: Leveraging Websense HoneyGrid Computing (*see*
13 *e.g.*, [WP_HoneyGrid_Computing.pdf](#) at 3, attached as Exhibit E, states when describing
14 ThreatSeeker that “[s]ecurity teams have no choice but to find a reliable way to allow
15 productive use of the Internet, while safeguarding essential enterprise information from loss or
16 theft.”).

17 37. Websense instructs users, including employees, to use and test the Websense TRITON
18 Products, Web Security Gateway Products, Data Security Products, CSI Service and Websense
19 products and services using ACE or ThreatSeeker. For example, Websense provides a technical
20 expert to assist users in installing, configuring, and troubleshooting Websense products. *See*
21 <http://www.websense.com/content/training-and-technical-certification.aspx> (attached as Exhibit S).
22 Websense maintains portals at www.MyWebsense.com, <http://csi.websense.com/> and
23 <http://csi.websense.com/ThreatScope/Index> that customers use to access updated patches and
24 hotfixes, product news, evaluations and technical support resources. *See*
25 <http://www.websense.com/content/TechnicalSupportPrograms.aspx> (attached as Exhibit T).

26 38. Websense provides security solution providers, managed service providers and system
27 integrators with the Websense Global Partner Program to encourage and expand use of the Websense
28 TRITON Products, Web Security Gateway Products, Data Security Products, CSI Service and
Websense products and services using ACE or ThreatSeeker. The Websense Global Partner Program

1 “offers a suite of benefits to enable business growth, including security industry expertise, tools and
2 support to help increase sales and customer satisfaction.” *See*
3 <https://www.websense.com/content/websense-partner-programs.aspx> (attached as Exhibit U). The
4 Websense Global Partner Program also offers access to Websense expertise, discounts, sales and
5 technical training and tools. Websense also offers the TRITON Security Alliance Program and the
6 OEM Partner Program. *See* [https://www.websense.com/content/websense-triton-security-](https://www.websense.com/content/websense-triton-security-alliance.aspx)
7 [alliance.aspx](https://www.websense.com/content/websense-triton-security-alliance.aspx) (attached as Exhibit V). Websense utilizes indirect distributors and value-added
8 resellers, which in North America includes Ingram Micro, Arrow Enterprise Computing Solutions
9 and ComputerLinks to distribute Websense products and provide credit facilities, marketing support
10 and other services. *See* Websense Form 10-Q of March 31, 2013 at 16 (attached as Exhibit W).

12 39. Defendant has had knowledge of the ‘494 Patent at least as of the filing of Finjan’s
13 first amended complaint and, by continuing the actions described above, has had the specific intent to
14 or was willfully blind to the fact that its actions would induce infringement of the ‘494 Patent. On
15 information and belief, Websense had knowledge of the ‘494 Patent’s application because Defendant
16 is involved in a lawsuit involving the ‘194 Patent, also owned by Finjan, Inc., and which shares the
17 inventor Shlomo Touboul with the ‘494 Patent.

19 40. Websense actively and intentionally maintains its website to promote the Websense
20 TRITON Products, Web Security Gateway Products, Data Security Products, CSI Service and
21 Websense products and services using ACE or ThreatSeeker and to encourage potential customers,
22 users and developers to use the Websense TRITON Products, Web Security Gateway Products, Data
23 Security Products, CSI Service and Websense products and services using ACE or ThreatSeeker in
24 the manner described by Finjan (<http://www.websense.com/content/Home.aspx>).

1 <http://www.websense.com/content/support.aspx>, www.MyWebsense.com, <http://csi.websense.com/>
2 and <http://csi.websense.com/ThreatScope/Index>).

3 41. Websense actively updates its websites, including Websense's Support Center, to
4 promote the Websense TRITON Products, Web Security Gateway Products, Data Security Products,
5 CSI Service and Websense products and services using ACE or ThreatSeeker to encourage
6 customers, users and developers to practice the methods taught in the '494 Patent
7 (<http://www.websense.com/content/Home.aspx>, <http://www.websense.com/content/support.aspx>,
8 www.MyWebsense.com, <http://csi.websense.com/> and <http://csi.websense.com/ThreatScope/Index>).

9
10 **PRAYER FOR RELIEF**

11 WHEREFORE, Finjan prays for judgment and relief as follows:

12 A. An entry of judgment holding Defendant has infringed, is infringing, is inducing
13 infringement, and has induced infringement of the '494 Patent;

14 B. A preliminary and permanent injunction against Defendant and its officers, employees,
15 agents, servants, attorneys, instrumentalities, and/or those in privity with them, from infringing the
16 '494 Patent, or inducing the infringement of the '494 Patent, and for all further and proper injunctive
17 relief pursuant to 35 U.S.C. § 283;

18 C. An award to Finjan of such damages as it shall prove at trial against Defendant that is
19 adequate to fully compensate Finjan for Defendant's infringement of the '494 Patent, said damages to
20 be no less than a reasonable royalty;

21 D. A finding that this case is "exceptional" and an award to Finjan of its costs and
22 reasonable attorney's fees, as provided by 35 U.S.C. § 285;

23 E. An accounting of all infringing sales and revenues, together with post-judgment
24 interest and prejudgment interest from the first date of infringement of the '494 Patent; and
25
26
27
28

1 F. Such further and other relief as the Court may deem proper and just.
